Re: Media Bureau 18-184

I am the President of Contemporary Communications LLC, licensee of KZYQ(FM), Eudora, Arkansas.

I hereby express my support of the MMTC and SSR Communications proposal to allow eligible Zone II Class A stations to upgrade in power from 6,000 watts ERP to 12,000 watts ERP.

KZYQ(FM) is a Class A FM facility licensed to a very small rural community in southeast Arkansas. While we serve thousands of acres of farmland, people are scare. Enabling us to increase our power would improve our service to the nearby communities of Lake Village, Arkansas; Dermott, Arkansas; McGehee, Arkansas; and Greenville, Mississippi.

I encourage the Commission to implement MB 18-184 so that stations such as mine are better able to serve the public.

Sincerely,

Larry Fuss

CARRY Delen
